August Gardening Tips

- ***Be consistent with watering, especially with new plantings.*** Water more frequently as the heat has increased. Be sure to give container plantings a good drink of water every day.
- Keeping flowers, shrubs, trees, and lawns healthy is the major task during this month! This means close observation for insects and diseases. Water, water, water.

- Ants are here! Sprinkle ***Fertilome’s Come and Get It!*** Fire Ant Killer around mounds created by ants in your yard and they are sure to pass away.

- Keep roses healthy and actively growing. Apply ***Fertilome Rose Food.***

- Continue spraying shrubs for insects and disease as needed. Remove any foliage affected by disease from the plant and the soil around it. ***Fertilome Broad Spectrum Landscape & Garden Fungicide*** works wonders!

- ***Don’t forget your summer supplies such as tools, topsoil, potting mix, mulch, and pine straw!***

Lawn Care

- Watch for lawn insects and diseases and treat if needed. For those pesky bugs, consider using *Hi-Yield Bug Blaster* in granular form.

- Apply *Fertilome Lawn Food Plus Iron* to your lawn; water thoroughly after application. This fertilizer is high in nitrogen and iron to keep the lawn looking green and lush during the hot summer months!
